

Ancient Meets Modern: Mapping the Tropics "Difficult-to-Map" Landscapes and Their Connections to Wildlife

PRESENTED BY

Dr. Anthony R. Cummings

University of Texas at Dallas

Mapping the dynamism and change within swidden landscapes remains a pressing challenge. While swidden landscapes are synonymous with the tropics indigenous peoples' and their associated wildlife, land-use change threatens these agricultural systems' existence. In this talk, I provide an overview of efforts to map swidden landscapes in collaboration with the people who create them.
